POP-UP TURNER GRID/ ROLLER UPGRADE

For PSI model 2200 Palletizers.

ASSEMBLY: POP-UP TURNER ASSEMBLY

Overview: Change the existing Bag Lifting 'Cross' to a 'Grid' style design.

Advantages:

- Provides additional bag contact and support during the lifting and turning cycles.
- Helps to minimize bag slippage during the initiation and completion of the turning cycle due to the added bag contact.
- Bag support is now present towards the corners of the bag, and across a greater portion of the bag width, minimizing the previous bag overhang in these areas.

Included in Upgrade Package:

- Pop-Up Turner Bag Lifting Grid
- Rubber Lagged Shaft Style Rollers with openings present for Grid clearance.
- Engineering, drawing updates

Installation by PSI Field Service is highly recommended.

Packaging systems International is the only licensed and approved system, parts and service vendor of the for-mentioned company.

Selling Price **\$6,150.00ea.**

Field Service costs are not included in the selling price.
