LOAD PLATE HTD BELT UPGRADE

For PSI model 2150, 2200 and 2300 Palletizers.

Overview:

- Convert from chain operated load plates to HTD belt operated load plates.

Advantages:

- Excellent for food grade operations.
- Elimination of grease and oil from chains, sprockets and chain travel path.
- Eliminates the possibility of lubricants contaminating the product or marring the bag surface.
- Greatly reduced maintenance requirements.
- Longer lifespan compared to chain.
- Quieter operation.

Features:

- Gates HTD belts.
- New belt tensioning devices.
- New belt sprockets and taper-lock bushings.
- New shaft bearings.

***Installation by our field service technicians is highly recommended.**

Selling Price Standard Model **\$5,080.00**

Note: HTD belt can only be used with thin load plates and rail guides. If thick plates or shaft guides are used the belt must be Poly GT.

*Installation costs should be based on one twelve hour day with one PSI provided Field Service Technician and one customer supplied technician, however actual time may vary depending on circumstances. Refer to the current PSI Rate Sheet to calculate hourly rate cost, travel cost, daily expenses, etc. Customer should be aware that requests for services not related to kit installation or plant-related delays will be billed at standard service rates. Call now for more information!

**Price or specifications may change without notice. Please consult with your PSI Service Representative for the most current information.
