THIN LOAD PLATE CONVERSION KIT

For PSI model 2200 and 2300 Palletizers.

Overview: Replace the existing Load Plates with a thinner profile design.

Advantages:

- Thin Profile Load Plates facilitate a shorter drop of the bag layer to the pallet or previous layer to help maintain a tighter, more consistent pallet load.
- Excellent application for thick or loosely filled bags.
- Effective in enhancing pallet appearance.

Included in Upgrade Package:

- Two (2) Thin Profile Load Plates

***Installation by our field service technicians is highly recommended.**

<u>Selling Price Standard Model</u>	\$13,380.00
-------------------------------------	--------------------

*New Load Plate Bearings are not included with this upgrade. New bearings can be purchased as a separate item, please specify if Lee bearings or Winkle bearings are required.

*Installation costs should be based on one ten hour day with one PSI provided Field Service Technician and one customer supplied technician, however actual time may vary depending on circumstances. Refer to the current PSI Rate Sheet to calculate hourly rate cost, travel cost, daily expenses, etc. Customer should be aware that requests for services not related to kit installation or plant-related delays will be billed at standard service rates. Call now for more information!

****Price or specifications may change without notice. Please consult with your PSI Service Representative for the most current information.**
